Operations and Reports

FOREWORD

Military Prime Contract Awards by State is published annually by the Office of the Secretary of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (WHS/DIOR).

This report provides information on Department of Defense (DOD) military procurement actions over \$25,000. The data are presented by state, according to the military department making the purchase. Information on

The report is approved for public release at cost; distribution unlimited. Requests for additional copies should be addressed to the Director for Information Operations and Reports, Washington Headquarters Services, The Pentagon, Room 1C535, Washington, D.C. 20301. (When ordering, cite publication number P10.)

TABLE OF CONTENTS

Introduction	1
--------------------	---

Tables:

Net Value and Percent Distribution of DOD Military Prime Contract Awards Over \$25,000 By State, According to Department: FY 1951 to FY 1983	3-36
--	------

INTRODUCTION

Military Prime Contract Awards by State provides an historical record of military prime contract awards by state, according to the purchasing department. This issue of the report provides data for Fiscal Year (FY) 1951 through FY 1983. Data are also provided for the transitional quarter which occurred in 1976 as a result of the Government's decision to adjust its fiscal year from a July 1 through June 30 reporting period to an October 1 through September 30 period. (See page 29.)

CHANGES IN REPORTING MECHANISMS

The primary purchasing departments within DOD are the Army, Navy, and the Air Force. On January 1, 1962, however, the Defense Supply Agency (DSA) was activated and assigned responsibility for purchasing certain common items (such as subsistence, clothing, and petroleum, and medical, general, and industrial supplies) used by the three departments. Beginning with the data for FY 1962, DSA figures have been reported separately. In 1977 the name of the agency was changed to the Defense Logistics Agency.

In FY 1963 data were obtained for the first time on contracts awarded by three other Defense agencies — the Defense Communications Agency, the Office of Civil Defense, and the Office of the Secretary of Defense. These three agencies were combined, for reporting purposes, under the heading "Other Defense Agencies." In FY 1965 the Office of Civil Defense was transferred to the Army and their data were included with the Army figures. In FY 1966 through FY 1979, data for the other defense agencies previously included in the "Other Defense Agencies" category were included in the Army figures. Since FY 1980, however, these figures have been included as part of the grand total only.

For FY 1951 through FY 1982, the data contained in this report represents contractual actions greater than \$10,000. Beginning in FY 1983, the dollar value threshold for contractual actions included in the data was raised to \$25,000.

NOTES ON COVERAGE

The data provided in this report reflect the following limitations and conditions:

Types of Contracts

This report provides data on prime contracts only and cannot be used to reflect the substantial amount of material and component fabrication and subcontract work that may be done outside the state where final assembly or delivery take place.

Military Prime Contract Awards by State also includes data on definitive contracts, funded portions of letter contracts and letters of intent, job orders, and purchase orders to industrial firms. Interdepartmental purchases made from or through other governmental agencies, such as those purchases made through the General Services Administration, are also included. The data include upward and downward revisions and adjustments, such as cancellations, price changes, supplemental agreements, amendments, and other changes.

Except for the data pertaining to petroleum products, this report does not include data on indefinite delivery, open-end, or call-type contracts. However, specific purchases or delivery orders placed against these contracts are included. Project orders, such as production orders to government owned-and-operated facilities like Navy yards, are also excluded, but contracts placed with industry by government-operated facilities to complete production orders are included.

Location of Contracts

This publication does not provide the user with a direct indication of where contract work is performed. For the majority of manufacturing contracts, data reflect the plant location where the product will be processed and assembled. In many instances, a prime contractor will have work done at more than one plant; in these cases, the value of the contract has been attributed to the state where the plant is located that will produce the largest dollar amount of work. Construction contracts have been attributed to the state where construction is to be performed. For purchases from wholesale or other distribution firms, the location is the contractor's business address. The location for service contracts is generally the state where the service will be performed. In the case of transportation and communications services contracts, the home address is normally used.

Limitations of Coverage

Contracts for civil functions are not included in the totals in this report. (Civil functions encompass planning, programming, designing, constructing, and operating Federal water resource projects for navigation, flood control, hydroelectric power production, water supply, recreation, and other related activities.) Also not included in the data are contracts not distributed by state, which include all contract actions, regardless of size, for performance in classified locations or for performance in the U.S. possessions, the Commonwealth of Puerto Rico, the Trust Territories of the Pacific, and other areas subject to complete U.S. sovereignty.
